Title	URL	Authors	Host item title
Kinetika i mehanizam reakcija homovanilinskog alkohola i hidroksitirozola s DPPH radikalom		Mustać, Stipe	
Kinetika reakcija kvercetina i DPPH radikala		Murković, Dorotea	
Primjena antisens peptida kao novi pristup liječenja ugriza poskoka		Marić, Marin	
UV-Vis i NMR analiza polifenolnih sastavnica maslinovih ulja		Križanić, Matea	
Kinetika i mehanizam reakcije katehina i DPPH		Dropulja, Ivana	
Modeliranje nekovalentnih interakcija u procesima solvatacije kvercetina i reorganizacije konformacije fragmenta U6 snRNA		Mihaljević, Frano	
Utjecaj temperature i izotopne supstitucije na UV-Vis spektar askorbata		Osmak, Silvia	
Utjecaj tetrapropilamonijevog klorida u PCET oksidaciji askorbata heksacijanoferatnim(III) ionima		Aužina, Tomislav	
Termodinamika ciklopaladiranja 4-dimetilaminoazobenzena		Prohaska, Boris	
Intriguing salt effects in the formation of hydroxamic acids from aldehydes and nitroso compounds		Lovrek, Monika; Pilepić, Viktor; Uršić, Stanko	
Formation of hydroxamic acids promoted by metal ions. Interaction of nitroso group with coordinated carbonyl group		Radivoj, Denis; Pilepić, Viktor; Uršić, Stanko	
β-Methyl-D-glucofururonohydroxamic acid, the first sugar-hydroxamic acid and its iron(III) complexes in solution		Uršić, Stanko; Zorc, Branka; Pilepić, Viktor; Vikić-Topić, Dražen
